

The construction of a main entrance to the school building will require alteration of the student drop off and pickup procedure. The red lines/dashes designate barriers placed to keep traffic away from students. The white dashes indicate a walking path/temporary sidewalk to be used during construction. Students being dropped off will be unloaded at the curb or temporary sidewalk. This area is designated in blue. Please pull up to the curb beyond the designated crosswalk and as far south as possible. Crossing guards will be available to ensure the safety of children to exit on the sidewalk. Please continue south and follow the flow of traffic to exit the lot. Students/Parents traveling through the parking lot to park will travel in the area designated in green on the map. Parents needing to come into the building are asked to secure a normal parking spot and walk on the designated crosswalk {Yellow Box}. Note the west side is one way only. The procedure was set to expedite traffic flow and for the safety of all. Please follow the direction of traffic control officials, turn your lights on and use turn signals.
